REPRESENTATIVE ECONOMIC CONSULTING EXPERIENCE

Labor and Discrimination

- Employment discrimination matters, including disparate impact and disparate treatment class action litigation, and various wage and hour matters, including FLSA class actions and PAGA representative actions.
- Expertise includes:
 - Disparate impact analysis.
 - Logistic and multivariate linear regression models to quantify the effects of candidate and employee characteristics on hiring, promotion, salary growth, and reductions in force.
 - Analysis of various human resource data, timecard, building access, and driving distance data to address liability and estimate penalties and damages.
 - Compensation audits.
 - Development and analysis of organizational diversity (DEI) metrics.

Valuation

- Projects involving the valuation of complex financial instruments, closely held businesses, executive compensation packages, and compensatory loss in medical malpractice.
- Developed a process to estimate the economic value of park district assets as part of a *pro bono* consulting engagement with the Chicago Park District and the Office of the Mayor. The process includes geospatial analysis of GIS data and hedonic price modeling of housing prices.
- Conducted market concentration and impact analysis for a national health food chain as part of merger and acquisition (M&A) matter.
- Expertise includes:
 - Black-Scholes, binomial trees, and Monte Carlo methods.
 - Traditional valuation methods, including market-, asset-, and income-based analysis.
 - Entrepreneurial finance, including market valuation and resource allocation for new companies.

Securities Fraud and Market Manipulation

- Securities fraud class action and market manipulation matters.
- Expertise includes:
 - Tests for market efficiency, loss causation, and price impact.

- Calculation of class-wide damages under 10(b)-5 and Section 11.
- Financial and econometric modeling to analyze volatility and pricing behavior for various securities in a wide range of markets, applying, for example, market models, intraday event studies, GARCH models and statistical tests for structural breaks.
- Design and application of econometric and statistical models to detect market manipulation such as cartel behavior, price-fixing, and bid-rigging in various commodities markets and rate setting environments such as LIBOR.

Data Analytics and Coding

- Proficient in SAS, SQL, Stata, Python, and R coding languages and software.
- Extensive experience building, managing, and analyzing large and complex multi-dimensional databases on high profile, data-intensive projects, including the *AMD v. Intel* antitrust litigation.
- Extensive experience designing financial, statistical, and econometric models.
